1 Introduction

The NiceVision IP Plug-in enables devices to be easily added to a site. The IP Plug-in takes into account the various issues that are required for a camera to be ready for plug-in, including:

- Decoder modifications
- PTZ management
- Camera control including, for example, API commands
- Video compression
- Audio support
- Etc.

Once a month Qognify releases an IP plugin package with new IP devices integrated in the NiceVision and FAST video management systems. Each release includes the installation files and the release notes with known issues and installation instructions. Find all relevant material on Partner Portal or ask your local Qognify representative.

The package is compatible with the following versions:

- VisionHub VisionHub SVR 4.x, 5.x
- NiceVision SVR Net 3.0, 3.1 and 3.2
- NiceVision SVR Net 2.7 and related service packs
- NiceVision SVR Net 2.5 and related service packs
- NiceVision SVR Net 2.0
- NiceVision SVR version 10.8 and related service packs
- FAST version 6.7 (PP2 and onwards)
- FAST version 6.5 (PP5 and onwards)

Notice that the following features are NiceVision-specific, and not related to the FAST plug-in.

- Dual Recording
- Multicast stream for edge device (Direct Streaming)
- PTZ support

This document lists all edge devices integrated in the system thru the IP plug-in mechanism.

Legend:

Symbol	Description	Comments
No asterisk	Devices certified for both NiceVision and FAST video management systems	
*	Devices certified for FAST and supported by design in the NiceVision system	
**	Devices certified for NiceVision and supported by design in the alpha system	

2 Supported IP Devices

To learn what IP devices have been integrated into the system, see the table below.
